Download ar	nd store repor	ts
 If you are moving while for those events. 	e selling an active event, you	u II want to download any reports y

Your users will not be moved during the migration, which means you'll need to add them in. Having a list with names and email addresses will make that easier.

Grab screenshots of any reserved seating charts

If you have any seating charts built on TicketLeap, you'll need to take a picture of each one, since these will not be automatically transferred to your new account. You'll need to manually rebuild them on our updated platform.

Luckily, TicketLeap's new and improved reserved seating feature makes it easy to rebuild your seating charts. You can even upload the screenshots you took and build right on top of them!

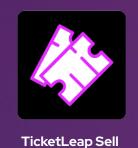

Check and prepare to move your Event Listings

Our new Event Listings are beautiful, but different. For example, you'll need a 1920 x 1080 pixel header image (or any 16:9 landscape image), instead of the vertical images you currently use.

Prepare for Onsite Sales

You'll need our new apps, TicketLeap Sell & TicketLeap Scan, to use at the door. In addition, if you want to take credit cards payments on site, go ahead and contact Client Services now to order your Stripe M2 card reader.

TicketLeap Scan
